STANDARD FORM 30 (REV. 10-83) Prescribed by GSA FAR (48 CFR) 53.243

Referencing the Statement of Work, Section IV – Basic Electronic System Requirements, Paragraph C.1. <u>ADD</u> paragraph g as follows:

- g. Additional Transaction Sets Required:
- (1) In addition to its other contractually required EDI ANSI X12 transaction sets, the Prime Vendor (PV) shall implement the EDI ANSI X12 830 Item Usage Forecast / Monthly Consumption History Data and the 997 Functional Acknowledgement as defined in the Defense Medical Logistics Standard Support (DMLSS) Implementation Guidelines (DMLSS IG) version 4010, or within the definition expressed in any later DMLSS IG version as directed by the Contracting Officer. The 4010 version is currently described in DoD Medical Prime Vendor EDI Implementation Guidelines, version 4010 1. These standards require the following:
 - (a) Schedule Type Qualifier. There are 2 types of schedule qualifiers:

BB: Customer Production Based (Consumption History)

PR: Planned Requirement Based (Usage Request)

(b) Dates. There are 2 date fields in the Beginning Segment that are used differently based on the transaction Schedule Type Qualifier used:

If Schedule Type Qualifier is BB:

BFR06 Date = Beginning Date of Consumption History

BFR07 Date = End Date of Consumption History

If Schedule Type Qualifier is PR:

BFR06 Date = The date the usage request is made +30. This is the date the items should be available for purchase.

BFR07 Date = NOT USED

- **(c) Purchase Order Number.** The 13-digit DSCP Prime Vendor contract/delivery order number (without dashes) shall be transmitted in the ANSI X12 830.
- (d) Planning Schedule Type Code. There are 3 different codes that could be sent on the ANSI X12 830 to identify how the transaction set is used.

PS: Indicates the transaction set is used to send monthly consumption history data

XA: Indicates the transaction is used to send item usage requests

- **(e) Assigned Identification.** There will be an alphanumeric character assigned for differentiation within a transaction set.
 - A + sequence number = Item Usage Request
- C + sequence number = Cancellation of a previously submitted Item Usage Request
- D + sequence number = Modification of a previously submitted Item Usage Request
 - H + sequence number = Monthly Consumption History Data
- **(f) Product/Service ID Qualifier.** There are 7 different qualifiers to be used to identify the Product ID number being passed.

Code	Name
HI	HIBC (Health Care Industry Bar Code)
IΒ	International Standard Book Number (ISBN)
N4	National Drug Code in 5-4-2
UK	UPC/EAN Shipping Container Code (1-2-5-5-1)
UX	Universal Product Number
VC	Vendor's Catalog Number
VP	Vendor's Part Number

- **(g) Product/ Service ID.** The identifying number for the item associated with the qualifier preceding it.
- **(h) Product Service ID Qualifier.** Code identifying the type/source of the descriptive number.

PD Item ID Description- Indicates the DMLSS Long Item Description

- (i) **Product/Service ID.** The long item description will be passed on the 830 transaction.
- **(j) Reference Identification.** The DAPA, GPO or FSS contract number will be passed on the 830 when appropriate.

(k) Identifier Codes.

<u>Submitters code:</u> The use of a 6-position alphanumeric DODAAC (Department of Defense Activity Address Code) or Customer ID, identifies the ordering points within a single ordering facility.

- (I) Functional Acknowledgement. For every ANSI X12 830 transaction that is sent, the PV will send a corresponding functional acknowledgement (ANSI X12 997). This acknowledgement verifies that the transaction set was received and indicates if any data segments had syntax errors. All valid ANSI X12 codes will be used.
- (m) Test Account. The PV must provide a test account within 15 days of the Implementation date of July 1, 2002 for use by the Government's systems consultant and integrator for testing the ANSI X12 version 4010, transaction sets 850, 855 and 830. Testing will consist of actual transmission of "dummy request/consumption history data" and the return of an ANSI X12 997 from the PV.
- (2) Transmission of Usage Forecast Data / Consumption History Data. The Government will transmit all Usage Requests and Consumption History Data to the PV via the Defense Automatic Addressing System Center (DAASC) located in Dayton, Ohio. The PV may connect to DAASC using File Transfer Protocol (FTP), asynchronous or bisynchronous modem dial-up. Alternatively, the PV may connect to a commercial Value Added Network (VAN)/ISP (Internet Service Provider), which must connect to DAASC. A toll free number will be provided to the PV for dialing into DAASC. If a PV chooses to use a commercial VAN/ISP, the PV shall be responsible for paying all set-up and recurring costs.

(3) DMLSS Requirements for Military Ordering Facilities.

(a) Primary Source (PS) - Ordering Facilities with DMLSS Program.

The PS shall implement the DMLSS Program EDI Implementation Guidelines (IG) for the ANSI X12, version 4010, 830 Item Usage Forecast / Monthly Consumption History Data and ANSI X12 997 - Functional Acknowledgment. The DMLSS EDI IG complies with the Federal Government's Implementation Convention (Fed IC) for version 4010. The document, incorporated by this reference, entitled "DoD Medical Prime Vendor EDI Implementation Guidelines Version 4010_1," is part of this contract. Note that the word "acknowledgment" as used herein, is synonymous with the word "confirmation" as it appears in the contract. The PS shall implement DMLSS Version 4010_1, ANSI X12 830 and 997 maps by the date this contract modification goes into effect.

- (b) **PS Ordering Facilities** *without* **DMLSS Program.** This **ANSI X12** 830/997 transaction set requirement only pertains to those MTF's that are currently using DMLSS.
- (c) Secondary Source (SS). There are no DMLSS requirements for the SS. NOTE: Notwithstanding the preceding, during the term of the SS contract, the Government reserves the right to expand the use of the DMLSS medical logistics automated information system to orders placed under the SS contract. If the DMLSS system is expanded to the SS contract, the SS agrees to implement the necessary changes to its electronic system in line with those requirements cited above for the PS contract. Note: SS is not currently supported under this contract; however, if they are added during the life of the contract, this requirement will apply.
